## Case study

# Computer Service Centre working in partnership with **Belmores Solicitors**

**Established in Norwich since the early 1980s, Belmores is a small but highly successful legal practice specialising in criminal defence and road traffic cases and representing clients nationwide.**

## **Belmores** Solicitors

*“There has always been a phenomenal level of service provided to us. You ask for something - it gets done.”*

Simon Nicholls  
Criminal Defence Lawyer

We organised the relocation of Belmores IT, as well as merging the data from both sites into a single unified system.

## The requirement

Having supported Belmores for some years, Computer Service Centre was asked by the customer to advise on and support their office move from Crown Road to King Street in Norwich. In the discussions leading up to their move, it was also decided that the Belmores team wanted to achieve more with their IT system and to make best use of time whilst away from the office.

## The solution

Computer Service Centre organised the relocation of Belmores IT, as well as merging the data from both sites into a single unified system. Further to this, our role has been to provide flexible working by deploying mobile solutions such as Blackberrys and notebook solutions. These now allow the Belmores team to respond to emails, create notes and reports both on and offsite, for instance whilst in court, and to synchronise these remotely and securely.

We continue to support and maintain the Belmores IT infrastructure and service their on-going IT needs.
